

## What You Get

### The Problem

Interestingly most schools do have something when you type in their www but the problem is that the sites are out of date and are difficult to maintain. Many websites have been done by parents, students or past teachers who cannot assist updating the site. Time goes by and then the site says last updated years ago.

SchoolWebsites.com.au seeks to solve the dilemma experienced by schools in trying to have an attractive website that is up-to-date.

### The Solution

We have created a system which basically allows you to have an easily updateable website within [5 Easy Steps](#). Our system will allow you to update your website with a "click of a button" Microsoft Word style easy to use Administration Centre. You can "Copy and Paste" content or type content in direct. You can upload images by simply browsing for them on your computer and uploading them. You can upload files such as your School Newsletter or mp3 files. Once you click "Save" your site is instantly updated. No hassle.

You can either have a new website and input content as you would into Microsoft Word or we can help you transfer existing content into this tidy and user friendly layout, giving your website an improved structure.

With SchoolWebsites.com.au, we have made it possible for 100% of your content to be updated. Any person with basic internet knowledge and image resizing ability can update the website from any computer with internet access. When you see how easy it is to update your site and how flexible the options are, you will actually enjoy the task of creating / updating your website.

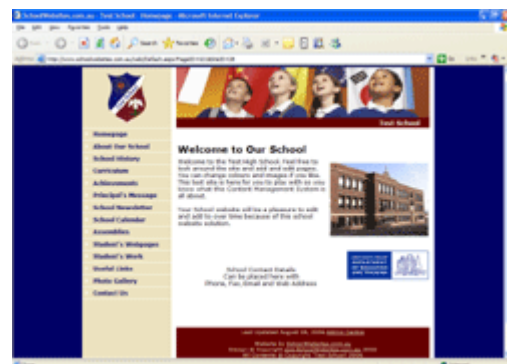

The other great thing about our system is that you can start off small with a few pages and build your website as time permits.

### Design Options

At this point in time we have 2 predetermined structures (with typical left hand navigation and top left crest) with great flexibility and colour choice thus allowing schools to have their colours, crest and photo choices. See [Sites Completed](#) to appreciate the variety possible.

Default Horizontal

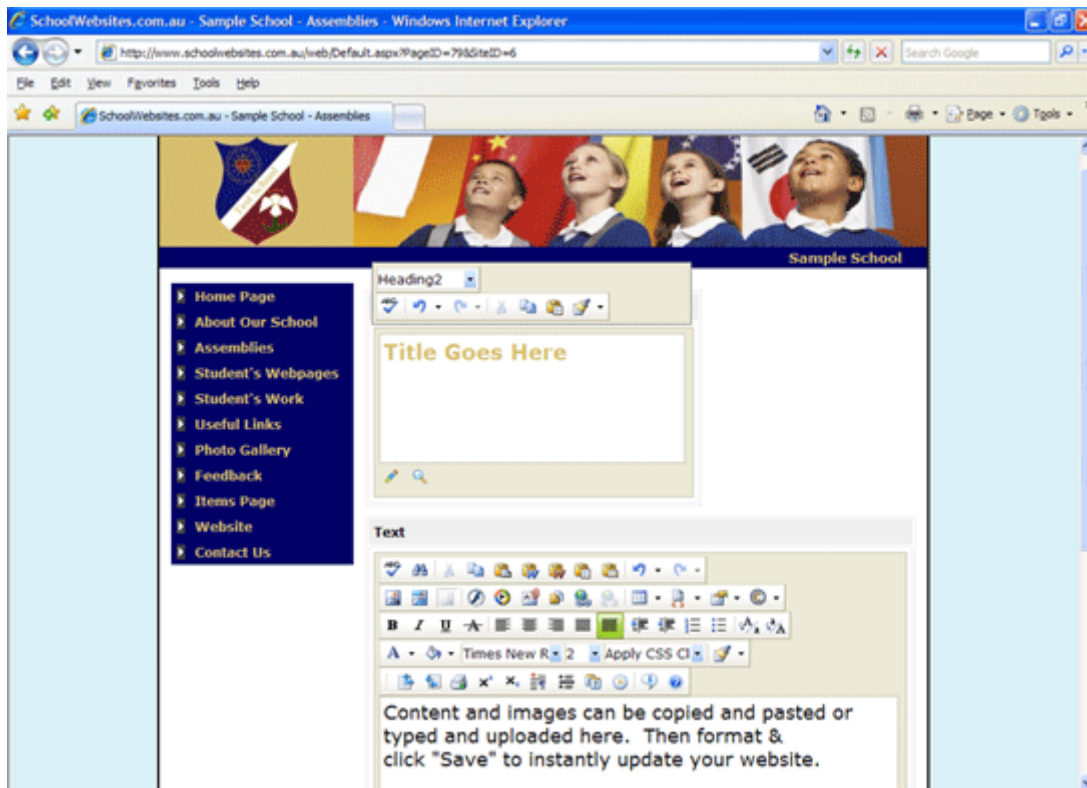

Default Vertical

## How it Works

All we need to do is sign up for a website and follow the [5 Easy Steps](#). We Set Up and design your main website structure based on photos and crest you email us. We will issue you with a user name and password so you can add content to your website via your Administration Centre. We can also assist you with transferring current content across to your new website from your current website or adding new pages. A small fee may apply.

Below is an example of how easy & flexible it is to input / edit content. All you have to do is select the area you want to edit, fill in details (choose formatting such as bolding or bullet points), upload images and click 'Save'. Your website will automatically update.

Once your main website structure is ready we will email you a single page that you can upload to your server to replace your current website that will automatically redirect to your school website on SchoolWebsites.com.au. When users type in your domain, which is usually something like [www.yourschoolname.com.au](#) or [www.yourschool-p.schools.state.edu.au](#), they will be instantly redirected to your website content. It will say "Click to Enter".

See below for example.

## **The Cost**

The best part is the cost. All you pay is only \$700 + GST for the initial website cost and then only \$350 + GST per year for hosting, during hours and after hours phone support and the use of the Content Management System (Admin Centre) where you can log in to update your website as often as you like from any computer with internet access.

## **Benefits**

We believe that you will be completely satisfied and your teachers, students and parents will be very grateful for the valuable resource and the website dilemma solved. You will have no one complaining to you about the website and that it needs fixing.

Whether you are a public school, high school, private school, state school, preschool, music school or any other type of school we can help make your website experience easy and even enjoyable.

## **What you need to do**

The next step is to sign up for your website. Go to [Sign Up](#) and fill out the online form or call **1300 857 303** any time.

We look forward to helping you.
